

EMPIS[®]

Programmable Infusion System

Part of the Culex[®] family of modular, software-linked products, Empis[®] automatically delivers drugs with hands-off, low-stress dosing.

> FEATURES

- Fully programmable for a multitude of dosing regimens
- Steady-state infusion
- Pump refills automatically for long-term infusions and in vivo microdialysis
- Program drug-drug interaction studies and link them to PK/PD data
- Hands-off dosing via IV, gastric or duodenal catheters
- Work with Return to eliminate need for liquid swivel
- Delivers fluids automatically from three syringes and reservoirs to a single implanted catheter
- Automatically coordinate Empis dosing and Culex blood sampling protocols via software
 - Repeat dosing from one or two syringes
 - Continuous infusion with bolus loading dose
 - Synergistic dosing
 - Microdialysis
